# Poojan Anghan

Full Stack Developer | ## React.js | Python (Django, FastAPI, Flask)  
| REST APIs | Docker  
Surat, Gujarat, India

## Summary

Hi, I'm Poojan Anghan, a Full Stack Developer specializing in building scalable, production-ready web applications using React.js and Python. I develop responsive and high-performance frontend applications with React.js, while designing robust backend systems using Django, FastAPI, and Flask. My focus is on delivering end-to-end solutions that are secure, efficient, and maintainable. Currently at ExhiByte Solutions, I work across the full stack—building APIs, developing user interfaces, managing databases, and optimizing system performance. I have hands-on experience working on real-world systems such as ERP platforms, healthcare solutions, booking systems, HR & attendance management systems, and product-based applications. Core Expertise: • Full Stack Development (React.js + Python) • REST API Design & Integration • Scalable Backend Architecture • Responsive UI Development • Database Design (SQL, MongoDB) • Docker & Deployment I also leverage AI-assisted development and modern tools to improve productivity and deliver high-quality software. Open to Full Stack Developer / Software Engineer opportunities.

---

## Experience

### ExhiByte Solution

Full Stack Developer (React.js & Python)  
August 2025 - Present (10 months)  
Surat

Working as a Full Stack Developer, contributing to the development of scalable web applications across both frontend and backend systems.

#### Frontend Development:

- Built responsive and dynamic user interfaces using React.js
- Developed reusable components and improved UI performance
- Integrated REST APIs for seamless data interaction

#### Backend Development:

- Developed APIs using Flask and FastAPI
- Designed scalable backend architecture and business logic
- Managed database operations and optimized queries

#### Key Contributions:

- Improved application performance and reduced response times
- Delivered end-to-end features from UI to backend
- Collaborated with cross-functional teams for efficient delivery

#### Tech Stack:

React.js, JavaScript, Python, Flask, FastAPI, REST APIs, SQL, MongoDB, Git, Docker

### Tryon Infotech

2 years 3 months

#### Python Developer

July 2023 - July 2025 (2 years 1 month)

Surat

Worked as a Python Developer, focusing on backend development and API design for scalable applications.

- Built REST APIs using Django and Flask
- Designed and optimized database schemas
- Implemented authentication and authorization systems
- Contributed to ERP, healthcare, and booking systems
- Improved system performance and reliability

Tech Stack: Python, Django, Flask, SQL, REST APIs

#### Python Intern

May 2023 - June 2023 (2 months)

Surat

---

## Education

### Veer Narmad South Gujarat University, Surat

Bachelor of Computer Application, Information Technology · (June 2023 - April 2026)
